

REMARKS

Claims 1, 4-8 and 10 remain in this application. Claims 1 and 4-11 are rejected. Claims 2, 3, 9 and 11 are previously cancelled. Claims 1, 8 and 10 are amended herein to clarify the invention.

Applicant respectfully submits that none of the references teaches or suggests the claimed "texture moving means." The Suzuoki reference discloses adhering a still image picture to polygon surfaces (col. 4, line 30-36) but is, however, silent concerning moving the still image texture on the polygon. Rather, the Suzuoki reference discloses adhering a moving image texture (col. 4, lines 37-50) and does not teach or suggest moving the adhering position of the texture on the polygon.

The Examiner has noted that the Suzuoki reference teaches transforming 3-dimensional data to 2-dimensional data. However, this reference fails to suggest that claimed moving of the texture on the polygon, that is movement relative to the vertexes of the polygon of the texture pattern image as is required by the claim. That is, the claim states that the second texture is moved on the polygon.

Thus, it is respectfully submitted that the rejected claims are not obvious in view of the cited reference for the reasons stated above. Reconsideration of the rejections of claims 1, 4-8 and 10 and their allowance are respectfully requested.

In light of the foregoing, the application is now believed to be in proper form for allowance of all claims and notice to that effect is earnestly solicited. Please charge any deficiency or credit any overpayment to Deposit Account No. 10-1250.

Respectfully submitted,
JORDAN AND HAMBURG LLP
